I have been working as an freelancer for different foreign teams and organizations.

Languages

Nepali

Nepali language is my mother tongue.

English

Fluent speaker in english. With IELTS score of 7 not less than 6.5

Inventory Management System

01/2024 – 07/2024

This project's main motive was to make an platform where each and every shopkeeper's of production based business can keep their inventory record and can track their profit and losses. This project was big success as an college project for me.

Course Management System (CMS)

10/2025 – Present

It is an full-stack solo project. I am working on it for creating an course management system which handles lecturers, students, units, courses and lessons. Main motive of this project is to provide all type of courses and their management environment to the lecturers and colleges which will make easier to teach and for searching course related notes to students.
